Engineering Research Center for Computer Integrated Surgical Systems and Technology

Course concept

- Combination:
 - Lectures on computer-integrated surgery and related subjects by instructor, guests
 - Projects
 - Seminar on current research
- Similar material to 600.445, but with much greater implementation & project focus
- Prerequisite: 600.445 or my consent

8

Course Numbers and Credits

- 600.446 (3 credits)
 - Full course (lecture/seminar + project)
 - Advanced undergrads
- 600.646 (3 credits)
 - Same as 600.446 but intended for grad students
 - Projects tend to be more advanced
 - Project teams can consist of grad students and undergrads
- 600.452 (1 credit)
 - Seminar only

Contact Information

- Course web sites:
 - Wiki page: https://ciis.lcsr.jhu.edu/dokuwiki/doku.php?id=courses:446
 - Piazza: https://piazza.com/jhu/spring2015/600446452646/home
- TA = Paul Wilkening
 - Email: pwilken3@gmail.com
 - Office Address: Hackerman 137
 - TA office Hours = TBD
- · My office hours
 - By appointment (see Alison in Hackerman 200)
- My lab meeting is Mon. 11:00-12:00 in Hackerman B08
- ERC/LCSR Seminars Wed. 12-1:00 in Hackerman B17
- Medical Image Analysis Seminar (500.746, 520.746)
 - Jointly led by Prof. Taylor and Prof. Prince
 - Paper reading and discussion on medical image analysis
 - Tue 3:00-4:30 in Malone 107

Grades

- 600.446/646
 - 25 % seminar presentation/writeup
 - 15 % project plan
 - 10 % project checkpoint presentation
 - 10 % project final presentation (poster presentation)
 - 40 % project implementation & final report
 - Attendance can affect your seminar / presentation grades, so see me if you have special situation or needs
- 600.452
 - Letter grade or Pass/Fail
 - Grade based on seminar presentation & critical summary of pertinent research papers

Engineering Research Center for Computer Integrated Surgical Systems and Technology

Date conflicts

- · I will be out of town occasionally
 - So far: 2/24, 4/23
 - Will arrange for guest speakers
- We may need to find make-up dates
 - Pick an evening (e.g., 5-7pm) or dawn (7-8am)
 - Evenings preferred

q

Rough Calendar

- 1/27, 1/29, 2/3, 2/5 (if need): Discuss possible projects in class
- Pick project & seminar topics by 2/10 (preferably sooner)
- Approved project proposals by 2/17
- Project plan presentations 2/10 or sooner through early March
- Paper seminars March through April
- Project checkpoints mid-March through mid-April
- Project poster session on final exam day (May 9, 2-5PM)
- · Project final reports on final exam day
- Will modify a bit as semester unfolds

Engineering Research Center for Computer Integrated Surgical Systems and Technology

Projects

- Typically will involve some substantial implementation/ experimentation component
- Require a "mentor"
 - Me, colleague, or an end user
 - Mentor must interview you and agree that you are appropriate for the project
- Require funding/equipment support
 - Can come from me or end user
- Require a defined plan and budget
- Team projects encouraged

q

Project Web Sites

- The course web site is a Wiki
 - http://ciis.lcsr.jhu.edu/dokuwiki/doku.php?id=courses:446
 - Access to students-only pages is controlled
 - Log in with JHED ID
 - · I preloaded from class enrollment on ISIS, but may not have all.
 - Try login; if problem send your JHED id as soon as possible to me and the TA.
- · Piazza web site for communication
- Each group should maintain a project web site as a wiki page under the course web site
 - Will contain project descriptions and also PDF copies of all reports and presentations.
 - May contain media and other material as well.
 - Format and template guidelines on the web site
 - Each group will have permissions to write own site, read others in course
 - Each group should indicate if their web site may be viewed outside of course
 - Please respect the rules for where things can be put
 - Please keep them up-to-date. The TA and I will be spot-checking them.

Engineering Research Center for Computer Integrated Surgical Systems and Technology

Seminar Presentations

- Select a single important paper or series of papers
 (2-5) relevant to your project or other interest
- Give short (typically, 20 minutes) talk
 - Critical summary of what paper says & its significance
- Bring hard copy of presentation materials to class to be put in your notebook
- Also, write a short (3-5 page) critical review
 - Due day before talk (post on class WIKI page)
 - Will be flexible on due date for the first talks
- Copy of paper will go into your notebook & one to me
- Will be critiqued in class (in a friendly way)

600.446; Spring 2015 Copyright © R. H. Taylor Engineering Research Center for Computer Integrated Surgical Systems and Technology

Typical Outline (modify as appropriate)

- · 1 slide statement of your project
- Paper selection and why
- · Summary of problem & key result
- · Significance of key result
- Necessary background
- Description of what the author(s) actually did
 - Theory, experiment, etc.
- Your assessment
 - Importance, relevance to you, good & bad points, etc.
 - Possible next steps for this work
- Conclusions

Confidentiality and Projects

- Some of the projects may involve potentially patentable or otherwise confidential material
 - Premature disclosure can compromise patentability
 - Student inventors can get patents and licensing income
 - Some projects (e.g., those using ISI API data) may require students to sign a non-disclosure agreement with a company.
 - You need to close the loop with me on projects involving 3rd party confidential data, to be sure that something is publishable. Usually, this has not been a problem, but should be addressed early
- Web sites for these projects will be only accessible by me, the TA, the students involved, and the mentors
- To permit free discussion in class, we can <u>consider</u> this plan
 - The whole class can sign a non-disclosure agreement to cover in-class presentations and discussion (JHTT has promised a template)
 - If <u>any</u> student is uncomfortable with this, please speak up. In that case, we will not have such a blanket agreement.

Project Proposals

- "Closed" plan by 2/18 or before
- Approximately 3 page summary containing
 - Stated topic and goal
 - Team members, mentor
 - Short statement of relevance/importance
 - Short technical summary of approach
 - List of "deliverables" (min, expected, max)
 - Key dates & assigned responsibilities
 - List of dependencies & plan for resolving
 - Management Plan
 - Reading list
- Project plan presentations in late Feb, early March
 - Cover similar material to written proposals

13 600.446; Spring 2015 Copyright © R. H. Taylor

Engineering Research Center for Computer Integrated Surgical Systems and Technology

Project Checkpoint Presentation

- · Approximately 20 minutes talk
- · Given in late March, early April
- · Summarize/update plan material
- · Present work to date
- · Present problems, exposures, dependencies
- Bring hard copy of presentation materials to class to be put in your notebook
- Will be critiqued in class (in a friendly way)

q

Project Final Presentation (Poster)

- Currently planned for date of final exam, but may move to last day of class
- Standard format
- · Project should be done or nearly so
- · Present/demo results
- · Discuss work remaining to be done
- · Discuss significance of work
- · Discuss lessons learned
- · Prizes awarded in various categories

5 600.446; Spring 2015 Copyright © R. H. Taylor

Engineering Research Center for Computer Integrated Surgical Systems and Technology

Project Final Report

- Technical summary
 - Similar to a short conference paper
 - Explain background, problem, approach, results, significance, etc.
- Management summary (1 page)
 - Who did what
 - Discuss what was accomplished vs planned
 - Discuss what might be next
 - What you learned
- Technical appendices
 - Code, user's manual, etc. (may be on the Wiki)
